PROFESSIONAL SUMMARY

Backend Software Engineer with 5 years of experience building scalable RESTful APIs, role-based access control (RBAC), and authentication with NestJS, TypeScript, PostgreSQL, and Firebase. Delivered AI chatbot, e-learning, healthcare, and e-commerce platforms. Background in SQL data analysis, integration testing, and embedded systems.

WORK EXPERIENCE

Sep 2025 – Present

Senior Software Developer, BotBat — United Arab Emirates

- **Built a full-stack e-commerce chatbot platform** where an AI assistant analyzes user queries, retrieves relevant inventory items, and guides users to purchase.
- **Designed a node-based workflow engine** that routes conversations between AI agents and human support agents based on user intent and context.

Jul 2025 – Present

Backend Developer, Imdova — Cairo

- **Developed the backend** for a Courses platform (on-demand and live training) serving undergraduate medical students.
- **Built scalable RESTful APIs** for accounts, enrollment, video content, assessments, and certification.

Apr 2025 – Jun 2025

Backend Developer, Spotter — Cairo

- **Contributed to a fitness coaching platform** with personalized advice, progress tracking, and AI chatbot interactions; applied modular service design and scalable authentication.

Apr 2023 – Jul 2025

Backend Developer, Arcon Corporation — Cairo

- **Designed and developed scalable RESTful APIs** for large-scale educational and healthcare platforms.
- **Implemented RBAC and Firebase Authentication** for secure user and permission management.
- **Wrote integration tests** validating module interactions and business-logic requirements.

Sep 2021 – Mar 2023

Embedded Software & Robotics Engineer, Arcon Corporation — Cairo

- **Developed embedded systems for 51+ scientific projects** using Arduino, sensors, and electronic components.
- **Led robotics development** and supervised VEX robotics competitions, mentoring teams.

SELECTED PROJECTS

botbat.io

Botbat – AI Omnichannel Customer Engagement Platform

- Automates customer communication across WhatsApp, Instagram, Messenger, Telegram, email, SMS, and web chat.
- Includes intelligent chatbots, workflow automation, marketing campaigns, analytics, and a unified agent portal.

medicova.net

Medicova – Healthcare Professionals Platform

- Serves healthcare professionals in Egypt and the Gulf with job listings, accredited courses and diplomas, and a medical products shop.
- Provides exam question banks for licensing exams including USMLE and NCLEX-RN.

Demo video

Medyour – Medical Booking App

- Lets users book appointments, surgeries, and blood sampling operations.
- Integrated a third-party payment system for secure transactions.

Demo video

LMS System (NestJS, Firebase Authentication, PostgreSQL)

- Learning management backend with RBAC for admins, teachers, and students, covering courses, classes, and assignments.

Demo video

Real-Time Chat Application (NestJS, WebSockets, Vue.js)
- WebSocket-based messaging with instant updates and typing indicators across multiple users.

EDUCATION

Sep 2016 – Jul 2021

Bachelor of Science in Mechatronics Engineering, Faculty of Engineering, Ain Shams University — Cairo

Graduated with Very Good (GPA 2.98) | Graduation Project Grade: A+

SKILLS

Backend	NestJS, Node.js, TypeScript, JavaScript, PHP, Laravel, RESTful APIs, WebSockets, JWT, Firebase Authentication, RBAC
Databases	PostgreSQL, SQL, MongoDB, Google Firestore, BigQuery
Data & AI	Power BI, SQL Data Analysis, Python, Machine Learning, AI Chatbots
Testing & Practices	Integration Testing, Software Testing, Clean Architecture
Other	Java, C/C++, Vue.js, Arduino and Embedded Systems, UX Fundamentals

CERTIFICATIONS

IoT Development Using M.O.T Platform – ITI MaharaTech
Software Testing – ITI MaharaTech
Gamification in eLearning – ITI MaharaTech
UX Design Fundamentals – ITI MaharaTech
